IMOBX

A home. An agreement. A record of the money.

IMOBX is preparing a Rio housing pilot with a written rent-to-own pathway and project reporting.

01 Ground work: construction, property access and resident operations.

02 Digital work: clear information, questions and approved reports.

03 Current stage: design and evidence review.

IMOBX

Start with households and the home.

The intended pilot serves households displaced or excluded from ordinary housing finance.

01 Define eligibility and affordability with local participants.

02 Explain payments, maintenance and the ownership path in ordinary Portuguese.

03 Provide a support and dispute route residents can actually use.

IMOBX

A reference-based budget. A delivery plan to track.

Rafael’s $27,777 per-home budget uses CUB/SINAPI references and cost engineering.

01 Land $5,550 · construction $18,600 · solar $1,500.

02 Shared infrastructure $1,500 · legal/design $627.

03 Track the reference period, BRL scope and actual spending; the village assumes 36 homes.

IMOBX

One accountable organization coordinates the home.

Property control, resident agreements and builder responsibilities must connect in writing.

01 Document ownership or operating authority for the selected property.

02 Contract the builder and disclose related-party terms.

03 Specify what the resident pays, earns toward ownership and receives at completion.

IMOBX

Keep each source and use visible.

Rent, grants, service receipts and trading fees enter the books separately.

01 Pay taxes, collection and agreed property/organization costs.

02 Fund repairs, resident commitments, vacancies and reserves.

03 Commit growth capital under an agreed rule; assess any lawful surplus afterward.

IMOBX

Self-sufficiency has two tests.

Cover the homes already operating. Then finance the next cohort.

01 Test full operating costs through low or zero trading activity.

02 Account for rent ending when a home transfers to its resident.

03 Identify retained assets or recurring services; model expansion capital separately.

IMOBX

A voice comes from a role, not just a balance.

Consult on resident authority, delegated work and separately defined financial rights.

01 Resident voice on shared use and maintenance within agreed limits.

02 Time-limited delivery roles, conflict checks and replaceable representatives.

03 Occupancy and purchase rights stay protected by agreements and law.

IMOBX

Use digital records where they reduce work.

The Flock is the proposed Telegram desk. Arc is the settlement network; Arctide is a candidate application.

01 Approved rules, requests and responses make responsibilities visible.

02 Compare Arctide project fees with Argus and Uniswap alternatives.

03 SIAH/HiveDAO coordination is proposed backend work, not a deployed IMOBX claim.

IMOBX

Separate participation from financial entitlement.

A mission-led nonprofit operator and an investor dividend need distinct legal consideration.

01 Choose the legal form and protect restricted donations and resident commitments.

02 Define any financial claim, issuer, cash source and permitted offer/transfer route.

03 Reinvestment may grow operations; it is not automatic token yield or appreciation.

IMOBX

Evidence gates, with parallel work streams.

The distinct roadmap links housing delivery, governance and useful digital services.

01 Days 1–30: roles, entity/property evidence, scoped budget and consultation.

02 Days 31–60: cash rules and decision exercises; day 90: readiness decision.

03 Funded pilot → operating evidence → token decision and repeatable delivery.

IMOBX

Count homes and fulfilled commitments.

The first scorecard measures delivery, cash discipline and resident experience.

01 Budget and schedule variance; property rights and resident agreement.

02 Monthly source/use/reserve reconciliation; maintenance and unresolved issues.

03 Resident participation and progress under the ownership agreement.

IMOBX

Help define and verify the first pilot.

The next ask is practical expertise and a bounded delivery arrangement.

01 Property and building partners: confirm scope, access, costs and delivery.

02 Housing, accounting and legal partners: review rights, reserves and funding route.

03 Resident/community partners: test the agreement, information and support process.
