Who is preparing IMOBX, and where do the facts come from?

Version 0.9, 9 November 2026

Who does what, and which roles are still open?

Person or group	Role in the plan	Where it stands
Rafael Britto	Co-founder; a builder in Rio de Janeiro. Construction, budgets and local contacts.	No written duties yet.
John	Co-founder; communication, documentation and coordination of digital tools.	Helps prepare the project. Cannot spend IMOBX funding or sign for IMOBX.
IMOBX	Project organisation, agreements and account reporting.	Legal form and legal representatives are being defined.
OLYMPUS	Proposed builder, linked to Rafael; no contract signed.	Hired only after the work is agreed, prices are compared and someone independent of the builder approves.
Residents	Housing terms and participation in shared matters.	Rules and representatives to be agreed with residents.
Community or charitable partner	Access to property, households or funders, if a partnership is agreed.	Under discussion; nothing agreed.
Legal advice and accounting	Advice on agreements and accounts.	Rafael’s own lawyers and accountant; their role for IMOBX is still to be agreed.
Building inspection	An independent check of safety and of the completed work.	Open: we are looking for this person.
Funders and people who promote the project	Funding or work under their own agreements.	Get only the rights in their own agreement. Anyone paid to promote IMOBX must say so.

Because the proposed builder is linked to a founder, other people compare its prices, approve its contract and check its work.

Our sources

Sources for the research and figures.

Rafael’s budget and his account of the lofts

Rafael’s own figures: his budget of 30 November 2025 and 20 January 2026 and his answers of 4 to 6 November 2026, with the September 2026 CUB-RJ (Sinduscon-Rio).

IBGE: 2022 Census, favelas and urban communities

16.4 million people, 8.1% of the population, in the 2022 Census.

CAIXA: SINAPI

Brazil’s table of building costs, item by item. Anyone can use it to check the itemised budget Rafael is preparing.

CVM: Guidance Opinion 40

How Brazil’s securities regulator judges a crypto-asset: by the rights it gives, not by what it is called.

Law 13.019: definition for public-sector partnerships

Article 2 defines nonprofit organisations for this law.

Arc: official documentation

Arc’s own description of its network and payment tools.

Fundação João Pinheiro: 2024 housing deficit

About 5.77 million households are in the 2024 housing deficit by the FJP measure, which also counts families paying too much of their income in rent.

FipeZAP index, via Diário do Comércio

In the 12 months to September 2026, asking rents for new rentals rose 9.13% across the 36 cities the FipeZAP index tracks, and 14.80% in Rio. Inflation over the same 12 months was 4.58% (IPCA). The index follows asking prices in listings of ready flats, so rises in existing contracts are left out.

IBGE, 2022 Census, via Agência Pública

The 2022 Census counted about 11.4 million empty houses and flats, but an empty house or flat is not always where a family needs it, or fit to live in.

Agência Brasil, 9 December 2025 (read at O Povo)

A Caixa example: the bank finances up to 80% of the price under the SAC repayment schedule and up to 70% under the Price table. The term is up to 420 months, or 35 years. By our sum, the rest of the price, 20 to 30%, is the down payment.

Superlógica rental default index, via Diário do Rio

In Rio state, 3.68% of the rents the index tracks were more than 60 days late in July 2026. It covers contracts managed with Superlógica’s software, not every rental in the state.
